

General Comments

Yusuke Izumi

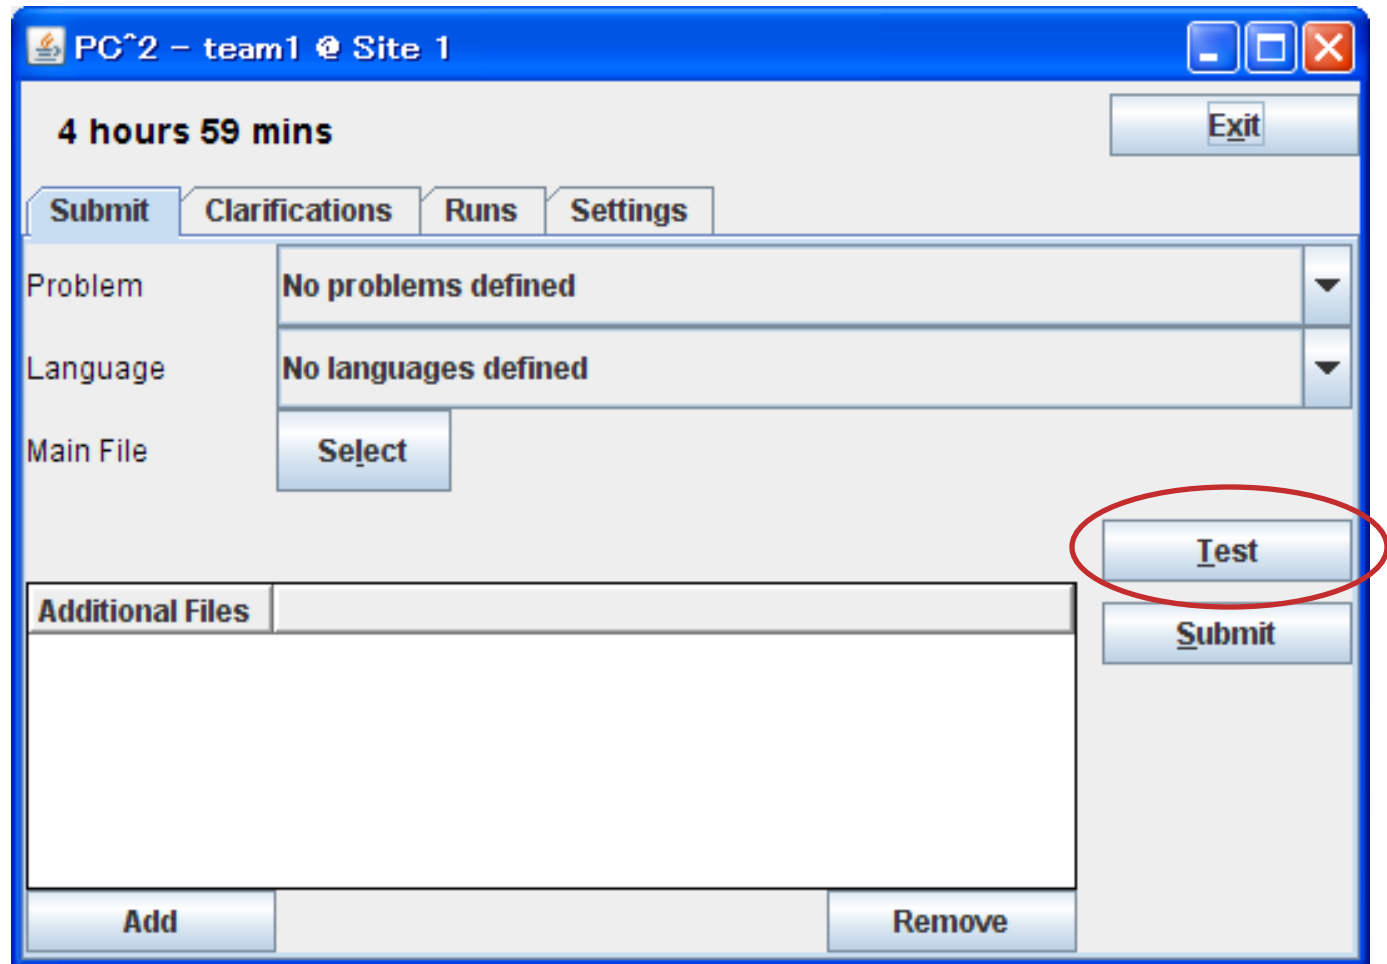

Apologies for Troubles

- We had 29 teams that participated in our contest.
- But we have only one machine for
 - PC² server
 - Web server
 - VPN server
 - Printer server
- We hope to make our system better next year.

Be Careful

- Read data from the file!
 - Otherwise you will receive "Time Limit" (despite of extremely low CPU time).
- Open the correct file!
- Get rid of debugging code!
 - e.g. Uncomment the line for `freopen(3)`.
- Submit to the correct problem!
- Submit with the correct language!
 - Unless you love 20-min penalties.

Use Test Button

Use Test Button

- This button provides the way to
 - compile the source code
 - run the binary
 - and show the output
 - in the same way as the judge does.
- Press Test before Submit.

Thanks for Participation

- We all wish your good luck on ICPC Regional Contest 2007!
